Art Unit: 1614

Claims 2-17 and 19-30 are presented for examination.

Applicant's amendment filed December 23, 2003 has been received and entered.

The terminal disclaimer filed May 10, 2003 was used to disclaim U.S. Patent No. 5, 871,714.

Accordingly, the rejection made under 35 USC 112, second paragraph as set forth in the previous Office action at pages 3 and 4 is hereby withdrawn.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 2-17 and 19-30 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 5-15, 17 and 23-27 of copending Application No. 09/587,818.

The present application and the copending application are claiming a composition comprising a first enzyme-anchor complex and a second enzyme anchor complex. Again, the Examiner does not see a difference between the two applications.

This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

Claims 2-17 and 19-30 are not allowed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 30 is rejected under 35 U.S.C. 102(b) as being anticipated by Simonson et al. (A), of record, for reason of record as set forth in the Office action dated August 22, 2003 as applied to claim 1.

Again, Simonson et al., teach a composition comprising enzymes attached to a carrier component designed to increase affinity of the enzyme to tooth surface (see column 2, lines 21-31). The enzymes disclosed by the cited references are glucanohydrolases such as dextranase. Note particularly column 3, lines 35-38 and 51 to column 4, lines 1-10 states the said composition is designed to have increased affinity to the intended surface and to material deposited thereon (biofilm). Simonson et al meet every aspect of the instant claim. Therefore, the applicant's instant composition is unpatentable.

Claim 30 is not allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
